

Erik Kallevig

Front-end web developer specializing in usable, accessible and engaging websites. More at ekallevig.com.

Skills

XHTML, CSS, JavaScript (native, jQuery et al.), W3C web standards (accessibility), user interface design, cross-browser compatibility, usability testing, prototyping, information architecture, SEO, PHP, MySQL, SVN, Git, WordPress, PmWiki, Apache, XML, XSLT, graphic production (Adobe, Quark), copywriting, operating systems (Windows, OSX, Linux).

Experience

Senior Front-End Developer, Sportsvite.com, New York, NY (2008-present)

Front-end web development (XHTML, CSS, JavaScript, Photoshop) on core and partner Sportsvite properties: sportsvite.com, truthonhealth.org, cbsintramurals.com and playcoed.com. Projects included site design / redesign, scripting projects (eg. dynamic partner widgets), usability testing, HTML email design / dev / testing and project management. Worked with back-end developers and directly with clients as both designer / developer and project manager.

User Interface Designer, KeyBank, Cleveland, OH (2006-08)

Front-end web development (XHTML, CSS, JavaScript and Photoshop) on KeyBank's public website (key.com) as well as their online banking application. Projects included online banking redesign, key.com redesign, new page design, section redesigns, promotional projects, scripting projects (Prototype, Scriptaculous and AJAX), usability testing, content management and wiki dev / design. Worked with back-end developers and lines of business.

Internet Production Coordinator, EH Publishing, Framingham, MA (2005-06)

Front-end development (XHTML, CSS, JavaScript and Photoshop) and content management on [EH](http://EH.com)'s 9+ websites supporting the flagship home electronics magazine, Electronic House, as well as other magazines and yearly expos. Projects included designs and templates on electronichouse.com and related sites, CMS development (simpleTAL), subscription form redesigns (circulation), information architecture and HTML email design / dev / testing.

Freelance Web Developer (2005-present)

Various freelance web development projects requiring hosting, domain and email setup, server configuration, site design, WordPress installation and customization, custom JavaScript projects (jQuery), PHP email and registration scripts, copywriting, content architecture and SEO.
